Subject: FW: Leviathan 2017

Could we do a quick call today to discuss this and NHPA generally?

I would like to understand what work and surveys were included in the Protocol we provided in 2016.

And confirm it covers this and other field work ongoing?

Lynda

Subject: Leviathan 2017

Good morning Lynda

I was contacted last week by Jessica Huddleston of Amec Foster Wheeler about environmental testing at a location called Camp Isbell. She indicated that there had been no previous archaeological investigation of the location, but her company just did a class III and we have not yet arrived at a decision on the significance of the site- its eligibility to the National Register.

Jessica asked the Forest Service if the testing could proceed based on their evaluation of the camp and the April 19 2016 EPA protocols. I told her I would contact the state and she if they are willing to work off the 2016 protocols.

First I thought I contact you and see what the status of 2017 EPA activities at Leviathan. I don't believe we developed a PA for the Leviathan activities- did we develop a 2017 protocol?

I apologize- the background for Leviathan and its present status seems a little complex to me

and I want to make sure we do everything that is required. We have three districts without an archaeologist and I have to spend a great deal of my time looking after them and Leviathan has been low on my radar.
